

Brookville **DRIVE-UP FLU CLINICS** are here!

By appointment only, please call 616.243.5707 option 2.

A few things to know...

- The flu vaccine starts at 6 months of age. Children 6 months through 8 years old need to get **2 doses at least 4 weeks apart** if this is their first season receiving the vaccine or if they only received one dose last season (prior to July 1, 2024).
- Family units are welcomed and encouraged (must be Brookville patients). Just let us know how many will be coming when scheduling!
- If you have an appointment coming up in the next month or so, you can receive the vaccine at that time. No need for a separate appointment.
- Please take a moment to look over the Vaccine Information Sheet (VIS) prior to your appointment to learn more about the flu vaccine.

So How Do Drive-Up Flu Clinics Work?

- When you arrive for your Flu Shot Clinic appointment, **please remain in your vehicle.**
- Dress for success! Patients over 1 year should wear short sleeves, patients 6 months- 12 months should have bare legs.
- Position children in car seat so the staff can easily administer the vaccine.

- We will have signs marking the parking spaces (see pictures below) designated for our Drive-Up Flu Clinics. In both our Rockford and Wyoming locations, we will be directing you to the parking lots in the lower level of the building.
- See you soon!
